Presidents Message

John Field

Welcome!

On behalf of **MAcintosh USers East** executive I extend a warm welcome to you and your families for the 1988 year. During formation of our group in 1987 we saw the group grow from just a concept between three people to a active membership in excess of thirty.

Our meeting nights covered a wide range of topics including **DeskTop Publishing, Telecommunications, DataBases, Apple Canada Product Fair Participation, Word Processing and Hypercard.**

Did you know that we were the first user group to publicly see **Hypercard** in Ontario..

Our success for the 1988 year will depend largely on your input.

We have listened to your need to better communicate with fellow members during the weeks between meetings. Therefore you shall soon see a membership listing consisting of all paid up active members including their work and home phone numbers and city in which they live in.

We encourage you to use this listing extensively to help solve problems and share ideas outside your regular meetings. Be sure to keep your executive in touch so these outside topics can be shared by all at our regular meetings and that our listing can be up to date.

The following are only some of the highlights planned for 1988.

Apple Canada to address us at least twice on product updates and understanding the Mac better.

Excel demo and those dreaded personal tax returns.

Filemaker +, on organizing your database for home / business use.

Macintosh and the Music business.

Desktop publishing an update.

LANS and WANS What are they and **What is AppleShare??**

Desktop communications trends and new standards??.

DOS and the Mac. Compatibility with those other!! computers.

Hypercard and how it has influenced the Mac.

Kids night to let jr. loose on games and software development.

The meeting nights will be held at St. Thomas Anglican Church in Brooklin until further notice and here are the following dates.

Jan 27, Feb 24, Mar 23, Apr 27, May 25, June 22, July 27, Aug 24, Sept 28,

Oct 26-General Business Meeting and Nov 23, 1988.

The meeting times will be starting at 7:30pm for all the above dates unless notified in **Double Click.**

The regular meeting night structure will be still featuring a special topic but we want to include more general user forums both for members in good standing and also for new members. The executive are also contemplating some special work shop seminars. Your input here is especially needed.

If there is some topic that you feel strongly about why wait until a regular meeting night **CALL YOUR EXECUTIVE** and arrange to have it discussed at our executive meetings which are held 2 weeks before the next regular meeting. If you feel very hot about a topic why not table it yourself at our executive meetings.

Membership fees. I know I know that they are up from 1987 BUT there is a very good reason for this. We want you to be better informed about events and other user group activities. We are arranging for shared use on a modem connection dial in bulletin board and at least bi - monthly mailings to you of our news letter **Double Click.** This all costs money. We your executive will insure that you get the biggest bang for 20 bucks that you can get in 1988.

Together we are Living the Vision.

TAPE DRIVE : November Meeting by Ken Hoyk TECH REP.

A variety of games were presented. **MicroSoft Flight Simulator**(\$80) -follows the Macintosh user interface but was completely reconstructed within the program. (Menu bar smaller, response to mouse click slower) -accurate flight simulation with weather, airplane instrumentation and reliability of airplane. -both prop and jet aircraft. -view from chase plane -70 seconds instant replay **Dark Castle**(\$60) -arcade game with multiple levels -digitized sound -fast paced **Maze Wars+**(\$60) -arcade game -can be played with two Macintoshes and modems -6 Macs in AppleTalk network (no other networking can be done) -digitized sound Three styles of ad-

venture games **Hitchhiker's Guide to the Galaxy** -all text -very complex -cute dodads given in box **Cyborg** -text with graphics to pretty the screen -originally for 128K Mac -will not work with Mac+ -works fine with Mac SE **Exodus**, **Ultima III** -graphic dungeons and dragons -role playin with multiple characters -explore countryside, towns and dungeons -extended fighting against foes. **Shadowgate** -all graphic equivalent of text adventure -point and double click on door to unlock, double click again to enter -click and drag to pick up item and drop into inventory window.

TAPE DRIVE Will be a regular feature, reviewing the main theme of our previous meetings

Mause Tracks

As you can see from the Presidents message exciting things are being planned for the **Mause Club**. As Editor of the *Double Click*, I have the duty of preparing all that interesting copy, any help from the ranks would be greatly appreciated.

This is our first mailout issue and we hope to provide you with plenty of useful information, in the future months on a regular basis.

It really doesn't matter if you are a seasoned disc driver or a mumbling mouser, we are planning on keeping everyone interested. And we would like to hear from you. Remember a club is only as interesting as it's members make it.

In the future you will be hearing about Mac Bulletin Boards which you can leave messages on, for complete electronic communication.

At present articles may be submitted on disc. Please, only raw, unvarnished, ASCII text or MacWrite files please. (also proper spelling where possible)

If you have Mac questions and problems you can always bring them up at our monthly meetings, or write a letter to me at the following address:

LASER SERVICE

Laser Printing Tips

For ImageWriter users who need Laser output

- Bring your own system file & application with you. MacDraw fonts vary according to the system used.
- Find out which fonts are Laser fonts, ImageWriter bit map fonts don't take advantage of the extra resolution of the laser, and can affect your word spacing
- Line up copy with Tabs, it is the only dependable way, don't rely on the screen position, don't use the space bar.
- Remember ImageWriter pages are wider than Laser pages. Use the chooser to select a Laser if you have one in your system folder and the pages will be displayed at the correct Laser printing width. Check with your Laser printing Centre if you're not sure.
- Avoid Macpaint images, they can only print at 72 dpi (at 100%)
